

GrantIQ™

Ideas Funded. Futures Built.

David Saruni

Kabarak University

PROBLEM STATEMENT

Grant administration in academic and research institutions suffers from inefficiencies due to manual processes, lack of transparency, and fragmented systems. This leads to delayed approvals, compliance risks, and reduced impact of funded projects.

Impact of the Problem

- 01 Inefficient workflows increase administrative costs by up to 20% (Source: National Science Foundation, 2023).
- 02 Lack of real-time tracking hinders accountability and decision-making.
- 03 Non-compliance risks penalties and loss of funding opportunities.

SUPPORTING DATA

\$1.7T **Global Funding**

Global research funding in 2022.

Grant Delays

Grants face delays due to administrative bottlenecks.

Compliance Issues

Institutions report issues from manual record-keeping.

Market Growth

Annual growth for digital grant solutions.

The Innovation

GrantIQ™

Ideas Funded. Futures Built.

Key Features

Grant Tracker

Proposal Builder

Internal Review

Project Dashboard

Report Submission

How GrantIQ Solves the Problem

Centralized Data

Real-time access for better decisions.

Automated Reporting

Reduces errors in compliance and finance.

Secure Collaboration

Connects applicants, reviewers, and grantors.

Equitable Access

Supports low-connectivity areas.

A large circular graphic with a dark blue background. Inside the circle, a hand is shown holding a glowing, wireframe sphere. The word "SOLUTION" is written in large, white, bold capital letters across the center of the sphere.

SOLUTION

VALUE PROPOSITION

Competitive Advantage

01

Interoperability:

Seamlessly integrates with accounting systems (e.g., QuickBooks, SAP) and national regulatory databases via APIs.

02

Offline Capability:

Ensures functionality in low-connectivity regions, unlike competitors.

03

Security:

Employs end-to-end encryption and MFA, surpassing industry standards.

04

Customization:

Modular design adapts to diverse grant types and workflows.

Market Opportunity & Business Model

Target Market

Universities, research institutions, and development organizations in Kenya and Sub-Saharan Africa.

Market Size

The global grant management software market is \$1.2 billion in 2024.

Revenue Streams

Subscription-based pricing, per-user licensing, and premium support.

Pricing Strategy

Tiered pricing(KES50,000 - 200,000 annually) based on institution size.

GO-TO-MARKET STRATEGY

01

Marketing & Sales: Targeted campaigns, cloud marketplaces, and academic conferences.

02

Partnerships: National Research Fund, Ministry of Education, NGOs.

03

Launch Plan: Pilot with 5 Kenyan universities in 2025, scale to 20 by 2026.

GO-TO-MARKET STRATEGY

01

Marketing & Sales: Targeted campaigns, cloud marketplaces, and academic conferences.

02

Partnerships: National Research Fund, Ministry of Education, NGOs.

03

Launch Plan: Pilot with 5 Kenyan universities in 2025, scale to 20 by 2026.

THE ASK

KES 400,000

COST ESTIMATES

KES 100,000 for development, hosting, and initial marketing.

REVENUE PROJECTIONS

KES 10M in Year 1 (100 institutions @ KES 100000), growing to KES 200M by Year 3.

THE ASK

Seeking **KES 400,000** for development and market expansion.
