

CURRICULUM VITAE

1. Name	David Saruni
2. Specialization	Software Development and Data Science
3. Employer:	Kabarak University
4. Nationality:	Kenyan
5. Email:	sarunidavid11126@gmail.com
6. Phone:	+254796789225
7. LinkedIn	linkedin.com/in/david-saruni-3a35b5222/
8. GitHub	https://github.com/DavidSaruni

9. Education

<u>School, college and/or University Attended</u>	<u>Degree/certificate or other specialized education obtained</u>	<u>Date Obtained</u>
Kabarak University	Bachelor of Science in Information Technology	2024
Olkejuado High School	Kenya Certificate of Secondary Education	2019

10. Professional Certification or Membership in Professional Associations:

- Beta Microsoft Learn Student Ambassador
- Coach Badge for Azure Responsible AI Dashboard (Zindi Africa)
- Data Science Africa
- Google Developer Groups, Nairobi

11. Others:

Trainings and Workshops

- Trainer on Microsoft Azure for Cloud Computing and GitHub Copilot.
- Participant and presenter at Data Science Africa events (Nyeri 2024, Kigali 2023) and the Kabarak University Data Science & AI Conference 2024.

Activities and Events

- Presented "Malaria Commodities Demand Prediction Model" at the Kabarak University Data Science & AI Conference (2024).
- Developed and presented "PMTCT Data Identification Automation Model" at the Kabarak University Data Science & AI Conference (2024).
- Developed an automated early disease detection model for cocoa farmers at Data Science Africa, Nyeri (2024).

12. Technical Skills

- Python (Django & Flask)
- PHP (Laravel)
- HTML, CSS & JavaScript
- Express, React, Node.js
- Kotlin & Jetpack Compose(Android Development)
- Fast Healthcare Interoperability Resources (FHIR)
- MySQL & PostgreSQL
- Microsoft Azure & Google Cloud
- Git & GitHub
- Docker
- Looker Studio, Power BI & MS Excel
- Moodle LMS

13. Languages

Language	Reading	Speaking	Writing
English	Good	Good	Good
Swahili	Good	Good	Good

14. Employment Record

Period	Employing organization and my title/position.	Summary of activities performed
2026 - Present	Kabarak University School of Science, Engineering and Technology <i>Graduate Assistant -</i>	- Facilitate a practical sessions on Data Science, Machine Learning and Artificial Intelligence (AI) for Workshop Practice Semester. - Participate in Research and Innovation activities - Patron Kabarak University Developer Groups to participate in Hackathons, Conferences and Competitions
2025 - 2026	Kabarak University DELT <i>Administrative Assistant -</i>	- Facilitated a training session on the responsible use of Artificial Intelligence (AI) in teaching and learning, enhancing lecturers' awareness of ethical, effective, and innovative AI integration in academic practice. - Introduced the use of QR codes for attendance tracking and training evaluation forms, significantly reducing paperwork while improving efficiency, accuracy, and the timeliness of feedback collection. - Strengthened expertise in Competency-Based Education (CBE) by actively participating in multiple training sessions on competency-based teaching, learning, and assessment in higher education. - Gained practical experience in digital tools for CBE implementation by assisting lecturers during training sessions on the effective use of Learning Management System (LMS) tools for competency-based teaching, learning, and assessment. - Developed a comprehensive digital inventory system for the Directorate of Excellence in Learning and Teaching (DELT) to promote transparent, organized, and accurate record-keeping of departmental resources. - Established a centralized digital repository for training resources, enabling lecturers and facilitators to easily access materials after training and supporting better preparation for future capacity-building sessions.
2024 - 2025	Mama's Hub <i>Software Developer</i>	- Developing an offline-capable maternal health information system using Android FHIR SDK and Open Health Stack. - Building and maintaining the administrative web application, incorporating all mobile app workflows. - Integrated REST APIs and FHIR services to enable interoperability across multiple healthcare facilities, reducing duplication of patient records. - Delivered real-time dashboards for ANC visits and immunizations, helping clinicians track maternal outcomes and intervene earlier in high-risk cases.

		• Maintained CI/CD pipelines that reduced deployment turnaround time from days to hours, ensuring rapid delivery of system updates. • Collaborating with healthcare professionals to enhance system usability and accessibility.
2023 – 2024	Ministry of Health, Kenya <i>Junior Developer</i>	• Contributed to the Electronic Community Health Information System (eCHIS), automating user account creation and deploying instances for multiple counties. • Gathered and communicated insights from reports to senior developers.
2023 - 2024	Health IT <i>Intern/Attache</i>	• Contributed to the development of a model to predict facilities not submitting PMTCT data during a hackathon. • Participated in developing a Malaria Commodities Demand Prediction Model. • Led UML Diagram design sessions for the Household Registry System. • Developed and tested REST API for the Household Registry backend using Laravel and PostgreSQL. • Participated in hackathons for KenyaEMR+ to fix bugs, add features, and optimize systems. • Trained Kabarak University students on setting up, deploying, and upgrading KenyaEMR+.

15. Referees:

Name	Employing organization and title/position.	Contacts	Email
Dr. Moses Thiga	Egerton University <i>Director - ICT</i>	+254 735679798	thigamoses@gmail.com
Dr. Laura Chheptegei	Kabarak University <i>HOD - SSET</i>	+254 725787173	laura.chheptegei@kabarak.ac.ke
